Club software made for pickleball

Take the admin out of your club nights.

Running a club night involves a lot of small jobs nobody signed up for: working out who has paid, copying names into a spreadsheet, sorting courts on a whiteboard while everyone stands about. Most booking apps were built for tennis clubs or gyms, so they take the booking and leave you the rest of it. Nexorally was written for pickleball clubs and covers the whole evening. It comes in four parts and you can take one or the lot.

RIGHT NOW

Working out who has paid, and chasing the ones who have not.

Bookings & Payments

- Members book and pay in the app, and the money goes straight into the club's own account
- Member and visitor prices on **the same list**, so a newcomer can see how many people are already going
- Club wallets so regulars top up once, waiting lists that sort themselves out, and a free first session for newcomers

EVERY SESSION

Someone spends the evening sorting courts instead of playing.

Social Sessions

- Courts are sorted for you based on session setup
- Round robins, mixers, ladders and box leagues are all built in
- It spreads players around so nobody sits out twice, with court slips you can print

SOUND FAMILIAR

Ratings living in a spreadsheet that only one person understands.

Graded & Ratings

- A doubles rating written for pickleball doubles from scratch
- Every game counts and the score matters, so losing 11-10 to a stronger pair still does your rating good
- Click a player to see their games and what each one did to their rating, week on week

EVERY RENEWAL

A members list in one place, subs chased by hand in another.

Membership

- One up to date list of who is a member, who has lapsed and who is new
- Subs paid and renewed in the app, with reminders going out on their own
- Member prices apply automatically, so nobody has to check a list at the door
- Member and non-member pricing - auto setup for each session's fee

Club leaderboard LIVE

1	Harry Preston		4.648 63% conf
2	Tom Whitfield		4.464 81% conf
3	Sophie Hayes		4.447 19% conf

Example board, names made up.

THREE STRAIGHT ANSWERS

Do players need an app?
No. It runs in a phone browser, so there is nothing to download.

What happens to our existing ratings?
We bring them across, so nobody has to start again.

How long does setting it up take?
About an afternoon. We load your members in for you, and you can start with one part and add the others later.

PAY FOR WHAT YOU USE

Take one part or the lot, priced accordingly. It is a flat fee for the club with no charge per player, and clubs already paying for a booking app usually find the full set works out cheaper. Happy to send figures.

Have a look for yourself.

Have a click around a real club board. Nothing to sign up for and nothing to install. Or give me a ring and I will show you round it.

demo.nexorally.com

> "It does pretty much everything a pickleball club needs, bookings, payments, graded sessions and player ratings, all in one place and, importantly, built specifically for pickleball rather than adapted from tennis. It has taken a huge amount of administration off our hands, and our graded sessions are noticeably better as a result. Once we move bookings onto player wallets, it will also cost us less than the system we previously used. And perhaps best of all, Paul listens to feedback and fixes things in days rather than months, which, in my experience, is not something you often get to say about software."
